PROFESSIONAL SUMMARY

Computer Science graduate (B.Tech CSE, 2026) with practical experience building full-stack web applications, and server-side systems. Proficient in Core Java with Experienced collaborating in Agile teams and delivering production-level features. Seeking a Java Developer role to deepen backend engineering skills and contribute to scalable software solutions.

TECHNICAL SKILLS

Language	Java , JavaScript
Frameworks	React.js, Spring boot
Databases	SQL ,Redis
Web & API	REST APIs, HTML5, CSS3, Bootstrap, Tailwind CSS
Tools	Git, GitHub, Postman, Docker, Kafka

EXPERIENCE

MBG Card Private Ltd

Software Development Engineer *January 2026 – Present*

- Develop and maintain scalable web features using REST APIs in a production environment.

Applied Core Java fundamentals for server-side logic, data processing, and backend API integration tasks.

- Collaborated with backend and frontend teams to improve system performance, code quality, and API reliability.
- Participated in code reviews, debugging, and sprint planning as part of an Agile development workflow.

The Entrepreneurship Network (TEN)

React.js Developer *December 2025 – January 2026*

- Built and deployed two web applications — a portfolio website and e-Mandi (agricultural marketplace) — using React.js and Tailwind CSS.
- Integrated third-party APIs and implemented dynamic UI components with asynchronous data fetching.
- Practiced component-based architecture and version control (Git/GitHub) in a collaborative team setting.

PROJECTS

Customer Relationship Management System :
https://taskcrm.mbgcard.com/

- Developed and maintained a full-stack CRM application used by 80+ internal users and 5,000+ external customers.
- Built responsive, scalable frontend features using React.js, TypeScript, Redux, and React Query.
- Supported and debugged Java-based backend services, resolving critical production issues across the stack.
- Collaborated with cross-functional teams to deliver stable releases and continuously improve system performance.

Weather App :
https://sakshi-learner.github.io/Weather-App/

- Developed a real-time weather application using React.js with live third-party API data fetching and dynamic UI rendering.
- Implemented component state management and asynchronous API calls — concepts translatable to Java reactive programming patterns.

EDUCATION

B.Tech – Computer Science & Engineering *2022 – 2026*
Shri Ram Institute of Science and Technology, Jabalpur | CGPA: 8.05 / 10

Class XII – MP Board *2022*
Government Higher Secondary School hita | 81%

Class X – MP Board *2020*
Government Higher Secondary School hita | 86%
